Most of the titles listed have been obtained from *Current Contents* and the *Review of Applied Entomology*, Series B. Selections are made so that mosquito control workers and researchers may keep abreast of current developments. Appreciation is expressed to Dr. Ronald A. Ward for providing many entries. The National Agricultural Library has been a valuable resource. The work was supported in part by Grant AI 15643 from the National Institute of Allergy and Infectious Diseases, National Institutes of Health, USDHHS.
