# FIRST . . . *and Best!*

## TODD INSECTICIDAL FOG APPLICATOR

*Successfully Used for over 10 Years in  
Community Fly and Mosquito Programs*

Tifa was first in the field of fog applicators. Tests have proved it best in the field for space control around the community . . . on the dump, over pools, in suburbs, everywhere insects swarm!

This amazing machine discharges newly-developed insecticides as well as the older types in a true, clean fog which spreads quickly and permeates the deepest crevices. This ability means a better insect control program for your community. Put Tifa to work for you!

- EFFICIENCY** | Uses insecticides in solutions, emulsions or suspen-  
**FEATURES** | sions.  
| Produces penetrating fog, dry or wet as you wish.  
| Droplet Control ranges from 1/2 to 200 Microns.

*Carrying Underwriters' Listing Seal*

Write for illustrated folder with full details and official comments.
