

ATLANTIC CITY IN '63!

The American Mosquito Control Association will meet jointly with the New Jersey Mosquito Extermination Association at Hotel Haddon Hall, Atlantic City, New Jersey on March 12 to 15 inclusive, 1963. This is the 50th annual meeting of the New Jersey Association and the 19th annual meeting of the American Mosquito Control Association. The several committees are busily developing an outstanding program including exhibits, field demonstrations of equipment, various and sundry gadgets and materials, outstanding speakers and social functions. Mark your calendar and arrange your travel plans to Atlantic City early.

More detailed information will be given in the December number of *Mosquito News*, and also in letters to the members. In the meantime, remember that the deadline for receipt of titles of papers is always well in advance of the meeting, and have your titles and abstracts ready; watch for the later announcements. Correspondence and inquiries for information may be addressed to Dr. B. B. Pepper, Secy. N. J. Mosquito Extermination Association, New Brunswick, N. J., or to Mr. T. G. Raley, Secy. American Mosquito Control Association, P. O. Box 278, Selma, California.

Nothing quite like this meeting has ever been held before in the history of mosquito control. It will be a historic conference, one that no AMCA member can afford to miss.

FLORIDA ANTI-MOSQUITO ASSOCIATION

Since 1922
