

ASSOCIATION NEWS

ANNUAL MEETING

1964

CHICAGO

1964

The joint meeting of the American Mosquito Control Association and the Illinois Mosquito Control Association will be held on March 1-4, 1964 at the Pick-Congress Hotel, Chicago, Illinois.

Early Arrivals

For the early arrivals there will be an opportunity on Sunday morning to hear the famous Paulist Choir sing at Old St. Mary's Church, 911 So. Wabash Avenue—only two blocks from the hotel.

Meetings

Board of Directors and other committee meetings will be held on Sunday, March 1.

Registration will begin at noon on Sunday.

Program

The program committee has arranged a program which will be highlighted by the following symposia and panel discussions:

1. Symposium: "*Aedes aegypti*: Organism and Problem"
Chairman: Dr. K. D. Quarterman,
U. S. Public Health Service
2. Symposium: "The Present Status of Insecticides for Mosquito Control"
Chairman: Prof. R. L. Metcalf,
University of California
3. Symposium: "Mosquitoes vs. Man vs. Mosquitoes"
Chairman: James N. Lesparre,
South Cook County Mosquito
Abatement District
4. Panel on Special Problems
Chairman: Dr. A. W. A. Brown,
University of Western Ontario,
London, Canada

Another of the ever-popular trustees'

sessions will be held, as well as sessions for submitted papers.

Something new is being added to this year's program—a so-called "Operators' Clinic" to be conducted for the benefit of the field men employed by various districts and for other practical-minded individuals. This will afford an opportunity for district employees to participate in a discussion and demonstration of actual equipment problems.

Social Activities

The annual banquet will be held on Tuesday Evening, March 3, preceded by the customary hospitality hour.

For the Ladies

Arrangements have been made for a tour of many of the points of historic and civic interest in the city of Chicago. This tour will afford visitors to Chicago a quick but comprehensive view of the city and some of its many attractions.

Tuesday and Wednesday will be available to the pursuit of the interests of particular individuals. Information will be provided as to points of interest, how to get there, and, more important, how to get back.

Tickets and arrangements will also be available to the ladies for various other activities such as Don McNeil's Breakfast Club radio show.

For All Visitors

Other things that might appeal include: Shopping on State Street with perhaps a guided tour through Marshall Field & Company's famous store, window shopping the "Magnificent Mile," the Planetarium, Shedd Aquarium, Rosenwald Museum of Science and Industry, University of Chicago, Chicago Natural History

Museum, Chicago Historical Society Museum, Chicago Academy of Sciences, Lincoln Park Zoo and Lincoln Park, Brookfield Zoo, the Chicago Water Tower, Northwestern University in nearby Evanston, "Old Town," McCormick Place, and particularly the famed Art Institute with its outstanding collections of paintings and sculpture. Nearly all are within 1½ miles of the Pick-Congress.

In addition, there are a number of famous night clubs and restaurants, many within walking distance of the hotel. Chinatown and Rush Street should be

seen and their restaurants enjoyed at night.

If you are driving, take advantage of Chicago's expressways to visit other places a little farther from downtown Chicago.

Unfortunately, at this time of year the bathing beaches will be closed, but nobody but a polar bear would be interested.

From the Prudential Building's "Top of the Rock" a bird's eye view of Chicago and Lake Michigan is a never-to-be forgotten sight.

Come early! Stay late, and enjoy Chicago as well as the annual meeting of the American Mosquito Control Association.
