AMERICAN MOSQUITO CONTROL ASSOCIATION MEETING, ATLANTA, GA., MARCH 6-9, 1966

The 1966 Annual Meeting of the American Mosquito Control Association will be held at the Atlanta Biltmore Hotel, Atlanta, Ga., March 6-9, 1966. The meetings will be opened Monday morning, March 7, with "Remarks" by AMCA President A. W. A. Brown and colored-slide presentations on "Programs for the Control of Biting Flies" by Dr. A. J. Rogers of the Florida State Board of Health, and "Ecological Studies on Encephalitis" by Dr. A. D. Hess of the CDC Greeley, Colo., Field Station. There will be four regular paper-reading sessions on Monday and Tuesday afternoons, and all day Wednesday. In addition, on Monday afternoon Bruce Brockway from Toledo, Ohio, will be Chairman of a separate session on practical control of backyard mosquitoes, with 10 well-known members of AMCA as participants. Tuesday morning, March 8, will feature a symposium dealing with the "Present Status of Insecticide Resistance in Mosquitoes" with Don W. Micks as Chairman, and such well-known speakers as A. S. Perry, W. Klassen, D. J. Sutherland, C. N. Smith, R. F. Peters, and A. W. A. Brown as summarizer. For those interested, there will be opportunities Tuesday afternoon to include a tour of CDC and an outdoor display of equipment for the control of mosquitoes at a local park. At CDC on Tuesday afternoon AMCA members will have an opportunity to observe tests for insecticide resistance in adults and larval mosquitoes demonstrated by members of the Biology/Chemistry Section, Technology Branch, CDC, from Savannah, Ga. Laboratories; a tour of the Medical Audiovisual Facility where motion pictures and television programs are produced; and the CDC Entomological Museum.

Plans for the Seminar on Mosquito-Borne Diseases—Past, Present Status, and Future—on Thursday and Friday mornings, March 10 and 11, 1966, immediately following the AMCA meeting are still in progress. The Seminar will be sponsored by AMCA and CDC and held in the Auditorium of the Communicable Disease Center, Public Health Service, in Atlanta, Ga.

Thursday morning will deal with malaria and feature such speakers as G. H. Bradley, F. L. Soper, and D. R. Johnson. Thursday afternoon J. V. Smith will discuss the relationship of water management and mosquito-borne diseases and feature a session on encephalitis with papers by T. H. Work, A. D. Hess, L. D. Beadle, and J. E. Scanlon.

Friday morning will begin with papers on yellow fever and dengue and *Aedes aegypti* Eradication by D. J. Schliessmann and V. P. Musa and continue with a discussion of dengue and hemorrhagic fever by D. D. Bonnet. J. F. Kessel will summarize recent developments in filariasis. T. D. Mulhern will discuss the public health aspects of pest mosquito control. K. D. Quarterman will summarize the Seminar. The program will end at noon Friday.

The Atlanta Airport, one of the largest and busiest in the Southeast, is about a half hour's drive from CDC. AMCA members can catch a flight from here to any part of the country on Friday afternoon and still spend the weekend with their families.
