

EDITOR'S NOTICE

The second edition of the world mosquito catalog was published in August (note slight title change). The full reference is: "Knight, K. L. and Alan Stone, 1977. A Catalog of the Mosquitoes of the World (Diptera: Culicidae). 2nd ed. The Thomas Say Foundation, Entomological Society of America, College Park, Maryland. Vol. VI, xi + 611 p." It is available at \$12.50 (postage paid in U. S.) per copy from: Entomological Society of America, Box AJ, College Park MD 20740 (payment should accompany order).

The cutoff date for the Catalog is December 31, 1973. To permit extension of catalog coverage through December 31, 1977, the U. S. Army Research and Development Command has provided a one-year extension of funding for the preparation of a supplement. This will be published in the summer of 1978. An appeal is made here for author's reprints of articles published after the cutoff date, excepting those which may already have been sent to the senior author (see address inside front cover).

Should any of our readers have been sufficiently intrigued by the intricacies of the *Heizmannia* male terminalia, so beautifully illustrated on the 1977 cover by Ms. Thelma Ford, to desire a copy suitable for framing, one can be had simply by a letter request.
