Introduction

The general format of the following collection records is that of Belkin and Heinemann 1973. The material is deposited with the Department of Entomology, United States National Museum, Washington, DC.

The author is greatly indebted to the staff of the Department of Medical Services, Government of American Samoa, Pago Pago. Special thanks are due Dr. S. A. Cheeseman and Dr. N. Siliga for their generous administrative support, and to Savaliga Saifoloi and Aulalo Tofilau for their assistance in the field. The author also wishes to thank Dr. John Belkin, Department of Biology, UCLA, for his encouragement and for loan of equipment, and Virginia Hansen for her editorial services.

The code AST is used for all collections in this report. The collector in each case is John D. Wright (JDW). Determination of pH levels was made through the use of pHdrion® paper.
