

## Editor's Corner

The ability to create and carry forward the publication of MOSQUITO SYSTEMATICS has in great measure been due to the administrative support given my position as head of the Department of Entomology, North Carolina State University. This support will terminate with my retirement on June 30, 1980. Because of this, I am transferring the editorship of MOSQUITO SYSTEMATICS to Dr. Lewis T. Nielsen on January 1, 1980. Dr. Nielsen, a recent president of the American Mosquito Control Association and an outstanding student of mosquito taxonomy and biology, is a member of the Biology Division, University of Utah, Salt Lake City, Utah. He has both the zeal and the administrative support necessary to carry on this effort and we are very fortunate in being able to get his services.

It is hoped that the fine support given me over the years by readers and authors alike will also be accorded Dr. Nielsen.
