

EDITORS CORNER

In the Editors Corner of the last issue, Vol. 20(2), August 1988, I included a list of entomologists whose biographies and/or bibliographies had been published in Mosquito Systematics. Overlooked on this list was the publication of a complete bibliography of Alan Stone's mosquito papers which appeared in Vol. 7(2), 1975. Ron Ward has called this to my attention and has provided me with three additional papers which need to be added to Stone's bibliography to make it current. They are:

1975. Stone, A. A bibliography of the mosquito writings of Alan Stone. Mosq. Syst. 7(2):148-152.
1979. Stone, A. The authors of names in Culicidae 1758-1977. Mosq. Syst. 11(4):300-329.
1981. Stone, A. Culicidae, pp.341-351 In: Manual of Nearctic Diptera Volume 1., J. F. McAlpine (ed.), Research Branch Agriculture Canada Monograph No. 28.

With Vol. 21, No. 1, 1989 we will continue our series honoring distinguished mosquito scientists with the biography and bibliography of Dr. Botha DeMeillon.
