## **EDITOR'S NOTE**

Beginning with Volume 23, 1991, *Mosquito Systematics* will be published in the 7"x10" size to conform with the *Journal of the American Mosquito Control Association* and other publications of the organization and will continue to be published on glossy paper.

Subscribers and readers should note that the Board of Directors at the March 1991 meeting in New Orleans has

authorized an increase in subscription rates. Effective for Volume 24, 1992, individual yearly subscription rates will be increased to \$25.00 and library rates to \$50.00. Reprint and page charges will remain unchanged. This is the first price increase for subscribers since 1982 and is necessary because of increasing costs of publishing the journal.
