

P. PULVERULENTA (Schreb.) Nyl. var. LEUCOLEIPTES Tuck. Little Fox River, *Macoun*.

P. STELLARIS (L.) Nyl. Ste. Anne des Monts, *Macoun*.

P. HISPIDA (Schreb.) Tuck. Ste. Anne des Monts, *Dodge 2856*; R. Cap Chat, *Dodge 2866*; between Mont Louis and Lac Mont Louis, *Dodge 2643*; Gaspé coast, *Macoun 56*.

FARLOW HERBARIUM.

TWO ADDITIONS TO THE FLORA OF MASSACHUSETTS.—During the spring excursion of the New England Botanical Club in 1921 I was collecting with Hon. J. R. Churchill in Ashfield, in a swampy meadow at an elevation of about 1700 feet. Here I was much pleased to find numerous specimens of *Carex Michauxiana*, one of the less common sedges of New England. The plant is abundant at similar altitudes in the Green Mountains, notably at Woodford and Somerset in southern Vermont, and is likely to be found in other mountain meadows among the Berkshires.

While driving over the Mohawk Trail on May 19, 1925, I was attracted by the flowering Amelanchiers in a bog in Florida, between the two summits of the Trail. One of them I thought at first was *A. Bartramiana*, but it had more flowers than that species, and bore some resemblance to *A. laevis*, which was also abundant in the swamp, yet in spite of the resemblance it was strikingly different from either of those species. My determination of it was *A. intermedia*, afterward confirmed by Prof. K. M. Wiegand, who kindly examined a specimen for me. In general appearance while in bloom it is intermediate between *A. laevis* and *A. Bartramiana*. It is described in RHODORA, xii. 147-148, 1920.

Specimens of these two plants have been placed in the herbarium of the New England Botanical Club.—CLARENCE HINCKLEY KNOWLTON, Hingham, Massachusetts.

Vol. 28, no. 334, including pages 181 to 208, was issued 6 November, 1926.

Knowlton, Clarence Hinckley. 1926. "Two additions to the flora of Massachusetts." *Rhodora* 28, 232–232.
