

CATALOGUE OF THE DESCRIBED COLEOPTERA OF
AUSTRALIA.

BY GEORGE MASTERS.

PART I.

CINCINDELIDÆ AND CARABIDÆ.

The large additions made to the Entomological Fauna of Australia since the publication of my last Catalogue of Coleoptera in 1872, and which was never completed, induces me to believe that the revised and complete Catalogue, of which I now lay before the Society the first part, will be found of great service to the Student of Entomology here, and not without interest to naturalists generally.
