### History of Case 2803

An application for the lectotype of the nominal species *Copromyza limosa* Fallén, 1820 to be replaced, so conserving the usage of the specific name and also that of *Leptocera* (*Rachispoda*) *lutosa* (Stenhammar, 1855), was received from Prof Ke Chung Kim (*The Frost Entomological Museum, Pennsylvania State University, Pennsylvania, U.S.A.*) and Dr Jindřich Roháček (*Slezské Zemské Muzeum Opava, Opava, Czech Republic*) on 12 December 1990. After correspondence the case was published in BZN 49: 127–128 (June 1992). Notice of the case was sent to appropriate journals.

A comment in support from Dr Terry A. Wheeler (*Carleton University, Ottawa, Ontario, Canada*) was published in BZN 49: 291 (December 1992).

It was noted on the voting paper that the representative list of references held by the Commission Secretariat demonstrating usage of the specific name of *Leptocera limosa* (para. 3 of the application) included the following publications:

- Richards, O.W. 1965. Family Sphaeroceridae. In Stone, A., Sabrosky, C.W., Wirth, W.W., Foote, R.H. & Coulson, J.R. (Eds.), *A catalog of the Diptera of America north of Mexico*. Agricultural Handbook No. 276. [*L. limosa* on p. 721].

Dupuis and Lehtinen abstained.

No votes were received from Kabata, Starobogatov and Uéno.
