

23. *Chlorocnemis elongata* Selys — Weibchen vom 8. und 15. Mai 1894.

24. *Chlorocnemis nubilipennis* K. — Männchen vom 5. Mai 1895.

25. *Pseudagrion melanicterum* Selys — Männchen vom 11., 14. und 17. October und vom 2. December 1893; Weibchen vom 2. November 1894.

26. *Pseudagrion deckeni* (Gerst.) — Männchen vom 8. Mai 1894. — 2 Männchen ohne Hinterleibsende vom 27. Juni 1894 und vom 11. October 1893 könnten derselben Art angehören.

Zwei neue *Myrmecopterae* vom südlichen Africa

beschrieben von Dr. med. W. Horn.

Myrmecoptera Gerstaeckeri.

Differt a ceteris speciebus forma parallela, elytris planis subtilissime sculptis, costis deficientibus.

Long. 16 mm. (sine labro).

1 ♂; Nyassa.

Labro brevi, angulo laterali acuto, in medio semicirculariter producto et quinque dentato (ut dentes septem exstent), toto flavo, marginibus ipsis brunnescentibus; antennarum articulis perparum compressis; capite fere ut in M. nobilitata Gerst. sed oculis minus prominulis et sculptura subtiliore; prothorace paullo breviori latioreque, valde planiore, apicem versus dilatato, superficie tota usque ad epipleuras multo densius subtiliusque transversim striolata; elytris basim versus minus angustatis quam in illa specie, planioribus, spinis apicalibus deficientibus, summo apice angustissime rotundato, sutura vix dentata (dente paullulum retracta), superficie tota densissime punctata (densius quam in aliqua specie huius subgeneris), foveolis perparvis parum distinctis, apicem versus vix minoribus, interstitiis incompletis (ut elytra fere granulata hinc inde videantur), foveis majoribus coeruleo-viridi-nitentibus omnino sat frequenter dispersis; signatura flava fere ut in illa sed lunula apicali paullo ante apicem disparente et hamulum longiorem antice (pone elytrorum medium) suturam versus emittente, linea tenui irregulari submarginali ab humero usque ad hunc angulum anticum signaturae apicalis ducta et cum hoc tenuiter connata; corpore supra subtusque nudo, coxarum posticarum parte laterali parce pilosa; pedibus paullo gracilioribus; coloratione clariore
