

The bulletins define the long-range plans drawn up by Farrand and her husband (a scholar and professor of history) and describe the steps she took toward establishing an institution that could serve a far-reaching community. Some of them focus on specific aspects of Reef Point Gardens: the site and its ancient geological history; the buildings and their redesign to accommodate public visitors; the plan of the grounds;

a walking tour; the library with its impressive collection of more than 2,700 volumes, documents, and archival material; the herbarium with over 1,800 pressed and dried specimens collected from the grounds; and the print collection. Some bulletins are devoted to special groups of plants in the garden and their cultivation and maintenance: conifers, single roses, the climbing plants that created what Farrand

1997. "Arnold Arboretum Weather Station Data- 1997." *Arnoldia* 57(4), 36–36.
