Prof. Dr. A. Gray.

Dear Sir,

I am so extremely occupied this time, being obliged to finish my work on the Brazilian Psychotria till new year, that only now I am ^{able} to prepare the list of desiderata of Lichens found by the infatigable Ch. Wright; generally in Cuba.

In the greater number of cases I could not quote the number of the collection, Dr. Treckerm's publication doing not indicate them, but I think you possess the lichens all exactly named.

I hope my friend Dr. Farlow will be so kind as to go over your collection of Lichens and give me, where that is possible, a specimen of the species of my list; yet small specimens, or bits, at least, will be very useful for me and will be accepted with the highest interest.

Müller, Johannes. 1877. "Müller, Johannes Sept. 21, 1877." *Asa Gray correspondence*
