

28⁶
Dallas. May. 1880.

Prof. A. Gray.

Dear professor.

I ought to have written you sooner
but have in the busy season for the Southern
Horticulturist and Daggon being a sort of this
trifurcate individual. and doing so many things.
it is nothing but natural that I am doing
nothing worth. but to the fact:

I have only two reverschonia growing, and these
two are males in full blossom now! you will find
enclosed herewith a small twig. if you have
not succeeded in growing any I will send you
a whole plant as soon as it will stop growing.
keeping the other for myself.

I have also seen fine specimens of plants
of the new astagalus, and have seen some radically
leaves of oster phyllolepis. They hardly differ
from the others, being smaller and little broader.

Reverchon, Julien. 1880. "Reverchon, Julien May 28, 1880." *Asa Gray correspondence*
