

San Fr
May 1

Dear Dr. Gray,-

I this note the down
which I spoke of
called upon you.
you will find other
that genus, Gilia,
tricolor, Laurentia &
carya.

Downingia No. 1 is
~~the~~ distinguished from
other forms by —

A pair of erect teeth at
the flat lower lip; and
ages usually sharply re-
tined to near the base, being
about as long as the an-

I have before seen
the other forms even

2 & 3. No. 3 I found
in the Red Woods of
Co. Is No. 2 Downy.
No. 4 has a concave
The "Live Oaks" speci-
I saw in bud in blo-
ing in a "waterhole" of
Oaks near the Nak.
About Apr. 20th. a boy
specimens. Sticking to
was the little Yaw-
fruit. The calyx is
which makes one at-
catch it in blossom.

The Gilias I
ing together and
dant on the mouth
of Clear Lake has

The long tube of
and the less diffus
of No. 2 seems to es-
from No. 1 Gilia Bo-

I hope the good
of *Mimulus tricolor*
the Live Oaks of
Elmme River —
the beds of dried up "a"
will be acceptable.

I send the Pe
because last year
gave me the name
for No. 1 from M.
Now I am in doubt
from the grain fields of
Elmme River, since
referred it to the same
and it evidently is
same.

Irene makes
species of the yell
Dianconvia specie
which I sent
1879. Unless m
is at fault, Dian

Rattan, Volney. 1885. "Rattan, Volney May 12, 1885." *Asa Gray correspondence*
