

AGRICULTURAL COLLEGE,  
CENTRE COUNTY, PENN'A.

possible after that I mean to  
be tied. For the present I am  
rather tired of having neither  
home nor resting place, boarding  
round, and sewing on my own  
buttons etc. two numbers to mention.  
Please remember me to Mrs  
Gray and say I hope she will  
soon be well and strong enough  
to get to Central Pa. Again  
— with you — G

Yrs truly  
J. F. Gottwein

Please forward direct the plants to me  
at Bellefonte Centre Co Pa.  
For Adams Expos. And also  
to notify me by mail of sending  
it.

May 7th 1868

Dear Doctor.

Sure took you and Mrs  
Gottwein from the influenza  
and flourishing like green  
bay trees. I send you by mail  
a *Polygonum* from Alaska.  
or like *triplocaeruleum* somewhat.  
*Astragalus alpinus*. And something  
I can't satisfy myself about ~~Mark~~  
~~No.~~ No 11 is also a puzzle.  
which you may either retain or keep  
as the state of your herbarium demands.  
I would be greatly obliged if you would  
settle for me then point of doubt.  
I have not the material to do with.  
It will wind up my Alaskan  
troubles. *Follia* & *Asplenium*.  
Go to you from my pupil A H Tuttle  
I told ~~the~~ him they were plants you

most likely want. But he  
produced them. Things here  
go on from bad to worse. I doubt  
whether we will have thirty students  
here next term. Prof. D. likely  
will leave, but so much the better  
for he has no executive ability,  
just what every one thought he had.  
most of him has thrown himself to horse  
least of. As for getting discouraged  
I'll show no sign of that. While here  
but will take a better place if one  
shows up. A year here as a training  
school will be of vast importance  
to me. After that I'll know the ropes  
well enough to get along "professing".  
My Man will send me long  
to give for the A. S. A. M.  
With your permission Mann may  
as well send those Cal. plants as  
please tell him to put the bill  
inside the package & send it by

mail or I'll forget the sum.  
I am under a thousand various  
obligations to you for waiting on me.  
To this day I wrote an article for  
the Naturalist or Figures Vegetable  
World. <sup>in my edition</sup> & as it is now full of "piracy"  
I don't know whether they will have  
the hardihood to publish it. I think  
however it is time Young America was  
doing its share toward reminding  
the friends across the water that  
some wicked things can originate  
even in England.

The desired work I'll send you  
in a few weeks or soon as I am  
done with the work which is now troubling  
me. I do want to be married coming  
winter but things look too unsettled  
yet. Besides I want to get a new  
microscope and get my herbarium  
arranged first. These two things  
will drain my purse. And I  
must have them. — Some as
