

a great worker and if he has
health will make a large and fine
Collection. He certainly knows how
to make good Specimens, and has
made many Capital ones the last
season — He finds what I consider
the genuine Carex Vulpina L. of which
I enclose a spike or two. I collect
here what Mr Cary called ss, but it
is different, and very near Dewey's
C. cephaloidea, and they are both
near C. Muhlenbergii than they are
near C. sparganioides — at least this
is my opinion — Mr Hall has
sent me Carex Richardsonii in fine
state. He is in a very interesting
locality.

I hope if our armies prosper to follow
them in an excursion the coming season
into the Southern States. I thank God
that the cause of Union & Liberty moves on.

Yours truly G. Vasey

Pingu

Dr. Gray

Dear Sir,

You 24th ult. was duly received
great obligation to you.

I forgot whether I
said anything to you
Astragalus Mexicanus —
an Astragalus which has
(I think I have sent you
which differs much from
given in the Manual —
Collected it only in fruit
Babb & Mr Sloper have
flower — The most prominent
is in the fruit, which is
not pointless, nor very obtuse,
in diameter, I have not seen

Vasey, George. 1849. "Vasey, George Mar. 28, 1862." *George Vasey letters to Asa Gray*
