

~~Dodder, David,~~

Descriptions of five new species of the Genus *Pinus*, discovered by Dr. Coulter in California
Pinus Coulteri, 440
" *nuncifera*, 441
" *radiata*, 442
" *tuberculata*, 442
" *brachycarpa*, 442

trans. Linn. Soc. 17, 439-444.

Department of Agriculture.

Dr. David - a monograph of *Strophurus*, Washington, Nov 3rd 1873
with the description of a new genus now first separated from it,
S. amplexifolius, 526 + syn

trans. Linn. Soc. 14, 525-534.
(1870)

Mr. George Watson

Prosartes longinosa, 532

" *Mungosii*, 533

Dear Sir,

The seeds sent you
in the spring were of Major Powells Collection.
I am glad that you have obtained something new
from them - I have been looking for more of the
seed but do not yet find any - of that which
was planted here very little came up, and of them
nothing that I thought valuable. I sent pack-
ages to several other persons - to Mr E Hall,
and I think to Eaton & some others, but have had
no Report. I enclose a few seeds of an Iris
and of the *Aquilegia leptocoma* from Arizona.

I am making up a package to send Dr. Gray and will
also send some roots with Dr. Pickering's package -

Yours truly Geo. Vasey
