

Davenport Dec 8th 1862

My Dear Dr Gray

Waiting in vain to hear from
Hale, and to receive my set of plants by which
I could arrange mine into supplementary sets
I now forward the whole by express leaving the
selection with you. I should have been glad to
save you this extra labor, but as the number
of specimens is not large, and are all
ticketed together, (the number being also
marked on the corner of the papers; it
will not be difficult by referring to the
accompanying list to pick out what you
want, and you can probably get some assistance
from one of your students, & pay in plants.
The list enclosed is in the order in which
they are packed in the papers the new
numbers commencing at 403, being put
in near where they belong. The number of
specimens as you will notice is quite
irregular, but the more interesting in the
largest amount & will probably suit your
purpose plant of division, leaving small
sets for my old subscribers who would not
care to get a full set of Halls.

About a fair division of proceeds. I should think it no more than right. That. Hall should allow me at the rate of \$11.00 per hundred for what he picks out of my collection to increase the value of his. Whatever is left, if Hall still insists on excluding them from sale, please use them in the way of exchange either for books or good specimens of interesting North American plants, or European alpine plants. I should prefer however, illustrated books, such as Hooker's Journal etc. It is my intention when I see my way clear to spend one or two seasons in the Old world. I should particularly like to spend a summer in the Caucasus -

A good letter from Torrey in his inimitable friendly style incloses a fine Photograph. Now I must have "G" to match. I will return the complement just good chance.

Sincerely yours

C. C. Parry

P.S. Mrs. P. at my side says "be sure tell the boy to put his autograph on the back of Photograph" She has a note ready for it in her album
