

transporation they had it  
might have been that I  
perhaps cannot fairly judge  
of its actual merits.

Brydman is strangely  
silent of late. I get no  
answers from him to direct  
questions. —

Yes if I could only ride on  
a Rail into Nevada Ter. I  
would gather some more  
Botanical Cream. Plenty to  
do out there for 5 years  
yet —

Sincerely yours  
B. C. Parry

Davenport Aug 16<sup>th</sup>/63

My dear Dr Gray

I have just  
received yours of 10<sup>th</sup> inst.  
I am annoyed not a little at  
Halls vacillations. he accepts  
my offer with so many provisos  
and conditions that it is hard  
to say whether he accepts or  
not and it generally takes  
not less than 3 weeks for  
letters to pass between us.  
I hope however before long to  
pin him down to a yes or no  
or so much, for so much,  
unconditionally. — By a letter  
received from him last even  
dated Dec 31<sup>st</sup>! he makes two  
offers which as well as I  
can understand is a bid for  
me to fall in price. heretofore  
specified and I thought definitely  
accepted. So I wrote at once

agreed. I to take \$240 =  
out of proceeds of sale of the 12 sets  
in \$20 = per set as sold.  
He to pay all express charges  
on the collection in his hands  
I to pay only for freight on my  
"long box" — So I advise him  
of that settles it to write to  
you and instruct accordingly.  
I have just packed up a large  
part of my botanical library  
for the bookbinders, which will  
knock me out of botany for  
about a month.

The Helianthella I will try  
& pack securely & send by mail  
I noticed and collected Pedicularis  
Crenulata and write you about  
it my specimen has a stalk  
of 20 capsules. The locality is  
not exactly South Park but  
an elevated valley of the Platte  
between South Park & Rader Park

Halls No 66 = my 287. you will  
have full material for now  
my last year's specimen  
was a straggler its true  
place is alpine rock crevices  
I should like copy of  
Gen Plantarum. on the same  
you mention if not too thick  
to send by mail & charge me  
with postage.

I think Hale profited by my  
criticisms. though he did not  
take it at the time, and put  
on side many species which  
he collected. which I do not see  
in the set. He also improved  
after parting from me by  
duplicating species by sending  
specimens. I am heartily  
glad that you find it improve  
on studying - it only comes  
so far below my bear ideal  
& that with the facilities of
