

DAVENPORT

Academy of Natural Sciences.

Davenport, Iowa, October 16th 1877.

Dear Dr Gray

I received your postal yesterday & sent as requested "Physiographical Paper" to Hooker. This week I hope you will have a chance to go over Palmer's plants. I hope find some good things. I send addressed to you a small parcel, mostly of interest to Palmer as he requested. In the parcel is a fragment of a puzzling Boehmeria from San Bernardino (my 113.) I enclose my notes, in several respects it seems to differ specifically from B. mexicana but may be only a var. I also had an idea that it might be the same as the leaf specimen of Dr Palmer found at "Calle" marked "Heuchera"? Let me know what you can make of it. Have just got Palmer's letter say to him that I will consider that Mexican scheme and decide before long. Am looking for Greene every day. Wishes like you he gives me the slip. Perhaps he is collecting Conifer seed

I hope not to overstock the market
I am not in the way to do much for Sargent
in Helianthus &c but I will do what I can
receive his Mem. which is in file.

A line from Lemmon. He has given a
very readable account of your & Hooker's visit
at Truckee in the Pacific Rural Press. but he
is poor & in low spirits. ~~Bey~~ now sorting
up my general Herb. a fearful job.

Yours

C. C. Parry
