

DAVENPORT

Academy of Natural Sciences.

Davenport, Iowa, October 5th 1878.

Dear Dr Gray: I am getting in working trim again, enclosed P. order for \$5. to pay for Flora. I have taken time to consider Helmstorf's letter, I think he is calculating on too big a job. My collections (which will not exceed 500 sp) were mainly with a view to connect the Mexican table-land flora, with U.S. and that is the point which I wish especially to bring out, which the larger work in progress will only briefly refer to. I do not think the determinations will be difficult and "Your Kew" is probably nearly as well supplied as Kew with N Mex plants. At any rate what you cannot name readily will make but a small parcel to be sent elsewhere, I think I would be willing to send a quite full set to Kew from my own interest in the collection ($\frac{1}{5}$) receiving in return their determinations of doubtful things and also a copy of the large work now being published. I to do the numbering & arranging in sets for subscribers. I suppose Palmers interest

also ($\frac{1}{3}$) he will want to sell. Palmer writes Aug 28th that he is making collections on the high Mts near St Louis - but the rains have injured his plants I hope he will get some interesting additions. My collections are at Metamoras waiting the raising of guerantane blockade. will hardly reach here before November. - I am now selecting and will send you soon a set of the *Compositac* collected on the route from San Luis to San Antonio.

I think I told you the genuine Solanum tuberosum grows near San Luis. the tubers sent to Sargent were different. They have raised them here quite respectable size (2 inches diameter) The genuine brought to market by natives is called "Papas Castellano's" or Spanish Potatoes. I have good flowering specimen indistinguishable from cultivated. It has not escaped cultivation. In shape to say Potatoes are not cultivated in Mexico, only the wild ones used. An Irishman in Saltillo tried hard to raise the cultivated species but did not succeed. I have G. Palmer to collect ripe fresh & fresh tubers.

Please ask Watson to send his Populus paper which I have not seen. will send Populus & Platanus in Comp parcel.

Yours truly

C. L. Parry
