

Kew Herb. Nov 7<sup>th</sup> 1884

Dear Dr Gray

In looking over  
a small set of plants from  
Colorado Canon collected by  
Prof Merriam is the ~~enclosed~~  
curious Camponotus which  
we are not able to match.  
As the characters are very  
distinct especially in the contrast  
between the wing & disc akenes  
you will at once decide  
what it is. I can report the  
result to Prof Olver who  
keeps the principal specimen.  
We leave next week for  
Iparanbe. Shall hope to hear

from you then.

Having written tales I  
send out envelope

Yours truly

C. C. Parry
