

I want to confer with you
confidentially on some Californian
matters.. particularly your
relations with Mr. Greene. He
complains to me of your treatment,
as not being generous &
straightforward. - i.e. making
use of his information & work
without proper acknowledgments &c &c
There is a nasty jealousy kept
up at the S.F Acad. more or less
against all Eastern workers and
you particularly. which I do
not like to see encouraged by
such a man as Mr. Greene.
Well enough on this side we
met

Yours truly
C.C. Parry

Westford, Conn Aug 28th 1885-

Dear Dr. Gray Thanks for your
letter of welcome, and enclosed
paper. As I infer that you &
Watson are both at home. I may
conclude to anticipate the time
you mentioned and go on to Cambridge
early next week. for the few
days I have to spare with you
It is quite unnecessary that
you should put yourself out of the
way to accommodate me. and
Mrs P. after her prolonged journey
is inclined to stay here till we
go west, and so thankfully declines
your kind invitation.

It is so delightfully cool &
pleasant here now that we
quite enjoy the chance

In your paper sent, I notice
you make a slip of the pen
calling Tetracoccus monoicus^{esp}
instead of T. dioicus as it should
be. Otherwise I am glad to have
you clear up the nodule so neatly
and establish T. dioicus. Engelm & P.
I am a little curious now to see
just what Engelmann did do
in the way of description, as I
took his pencil notes with me to
Lawrence, to put with the specimens.
I see a brief notice in Hartford
paper of the death of an old
associate Chas Wright (Aug 11th as
I make it) and found dead
in his barn at Wethersfield.) Of
course you will have a full botanical
notice of a very worthy though
peculiar man.

This is my 62^d birthday and
reminds me that just at this
age Dr Engelmann wrote me
in his playful way that "he
realized the necessity of not
getting any older" - but
on the other hand, seeing the
immense work you have
accomplished between 62 & 74
there is some encouragement
left. I have saved
yourself a great deal of tedious
work in destroying correspondence
after it has done its present purpose
but I have kept mine from year
to year. Which though not extensive
is at least bulky. Among these,
the most numerous & continuous
is that with Dr Engelmann
between 48 & 53. - Should they not
be put somewhere with his papers?
