

Weslby, Conn Sept 11th/85-

Dear Dr. Gray

(It is no doubt
better for you to say. (after
careful examination)

Phacelia tanacetifolia

var suffruticosa ^{sc}

I thought at the time better
characters would offer -

The enclosed letter from

C.R. Bratt H. may interest
you in some points. When read
it can be destroyed.

It is quite natural that
Greene should want to restore
Nuttall's genus under Ellisia.
to justify his own work,
but as a matter of judgment
he will hardly be followed.

I shall give Bratt a hint
to send Camp. & Muscat 1st to
you. When they find much
of greenes work is not accepted
Collectors will not be so
easily persuaded to abandon
the old botanical. head quarters
I have written to green
giving a full account of our
interview. venturing to assure
him that you are more
anxious to set him up (right)
than to put him down. (wray)

We leave next week Thursday
for Sandoga & N.Y. the week
after to Davenport

Yours truly
C.C. Parry
