March 24th 1887

Dear Dr Gray

Your sudden
"change of base" was rather a
surprise - but I hope it will be
a good move and a safe return.
I have barely time to reach
you with a letter, and you will
be too busy to look at small
items - But besides
Archistophyllum myrtifolium which is
as good a sp or there is in the
genus. I have stumbled on two
more = good, of which I send
enclosed scraps - A. viridissimum indeed
is very different from A. glauca,
in foliage &c & other particular,
of which I need not now trouble
you. The other is a find of
Mr Curran last year in pr

now by me in fl. It is one
of the prettiest sp. to which this
scrub does not do justice. It is
in full fl after 3 journeys which
goes with it is in early frith.
I will later send full specimen
to you at Kew, to be left there.

As free R.R. Transportation
is to be cut off after April 3^d
I shall probably have to leave
the field and return to Davenport
by May, unless I can make
some special arrangements
with Senator Stanford - which
I hardly expect - It is not
likely however to be a good
botanical season, not enough rain
and ground rapidly drying up.
So I console myself that I
may only be losing some hard
work & poor results

You have seen Ed Jr.
last effusively - I think it
would rather please him to
have it noticed - but as you
have decided on a different
policy I suppose he will keep
his course.

I may have some special
messages to send you at
Kew. till then please remember
me kindly to the Smithsonian
there - with best wishes for
a prosperous voyage

I am your truly
C.C. Parry

Parry, C. C. 1887. "Parry, C. C. Mar. 24, 1887." *Charles Christopher Parry letters to Asa Gray*
