

of Lake Superior, both  
collected by Robbins.

Aspid. Filix-mas. Lvg.

perfectly normal

and

Woodia Oregana. Eaton

I had the specimens,  
but returned them to Dr.  
Robbins, who has forgotten  
to thank me for my pains!

Ever truly yours,

S. Eaton.

New Haven.

Jan. 15. 1866.

Dear Dr Gray.

I am to be married  
the 13<sup>th</sup> of February. We  
expect to sail for Havre  
in the Fulton, the 17<sup>th</sup> of  
February, & to be gone  
six or seven months.

We are to have a great  
wedding reception from  
1 - 3 P.M. Tuesday Feb.  
13<sup>th</sup> at No. 34 West 26<sup>th</sup>  
St. N.Y. - and would  
be very much pleased

if it should suit  
your & Mrs Gray's con-  
venience to be present.

Under these circumstances,  
(unexpected till this year)

I had better not  
print anything on  
my Pteridologia until  
I return. Can you  
tell me where in Silb.  
Journal is your article  
on European Herbaria.

I want to examine  
Chamisso's, Michaux's  
Linnaeus' & perhaps Swartz's

herbaria - so as to be  
satisfied what were the  
types of their American  
species of Ferns.

As we expect to "do"  
Western Europe pretty  
thoroughly. I shall  
be able to go to almost  
any seat of botanical  
fame - & will be very  
thankful for any hints,  
directions. letters &c. &c.  
you will give me.

Please add to the  
manual two ferns  
from the Southern Shore
