

Daniel C. Eaton,
NEW HAVEN, CONNECTICUT.

Nov. 30, 1881

My dear Watson.

The *Cerro Island*
Isotriaena is same as Miss
Burbank's (Burbeck's rather) plant
from S. Diego Co. & as Parry's
from the Colorado desert. 1876.
I call it a form of *N. candida*.
Baker thought it a good
& undescribed species, which
it may prove to be.

What is this *Draba*? I can
make it nothing but *D. alpina*
var. *glauca*, but it don't look
like your specimens from 40th
parallel lat. *Utricularia alpina*

Yours very truly

D C Eaton

Eaton, Daniel Cady. 1881. "Eaton, Daniel C. Nov. 30, 1881 [to S. Watson]."
Daniel Cady Eaton letters to Asa Gray
