

Sierra Valley, California.
Nov. 11th 1873.

Prof. Asa Gray,
Harvard University,

Dear Sir,

A recent letter from Prof Bolander of San Francisco states that you report having named a flower after me the "*Astragalus Lemmonii*," of Sierra val. Cala.

Thanking you very heartily for the high honor you so kindly confer upon me, I shall attempt to show my appreciation by redoubling my efforts in the prosecution of what my generous friend Bolander terms "our amiable science." That I may

be sure of the species bearing
my patronymic, will you please
send me ^a spray of the plant?

I have traveled through cen-
tral California this summer and
collected a large number of
plants which as fast as I can
arrange I am sending to Prof
Bolander to determine. Perhaps
some are rare for I visited
many almost inaccessible points.

I enclose a few small ones.
I understand that you had
kindly consented to work up our
Botany for us this winter.

If my name occurs please no-
tice the peculiar spelling.

I am, my dear sir
Very respectfully
Yours &c,
J.S. Greenman,

BHL
