

wrote a few minutes daily,
Brought a wagon load of Plants
& books up, & feel sadly dis-
appointed because I cannot look
at them yet.

Prof. Watson intimates that the
Bot. Cal. will soon be revised
for a second edition, if such is
the case I should like to know
it this winter, as I would
like to offer several corrections,
and notes of localities.

I hope my dear patron, that you
are not over-working this winter &
that it will be long ere your
good right arm is paralyzed,

For your next season's excursion
will not your botanical party visit
Cal. & these High Sierras? Should
be proud to welcome you here,

Good Dr. Webber sends continued re-
gards & gratitude, You would be wel-
come at this Alpine Hospice any season,
Come & see,

Yours gratefully & sincerely J. C. Common

RECEIVED

Webber Lake, near
Sierra Valley, Cal., Dec. 12, '76,

My dear Dr. Gray,

Two weeks ago Dr. Parry wrote me
the result of my vigorous
appeal for Gilia Parryi.

I have waited for your
words on the subject but will
wait no longer since Dr. P.
declares that you concede the
fact of my prior discovery
& determination, so allow me
to express my deep gratitude
for this culminating honor
of this eventful year,

Dr. P. writes as though
my name would appear as
the names when published, an

honor which I did not expect so soon, but of course, one to which perhaps it is proper to aspire,

I am exceedingly sorry to learn of the paralysis of Dr. Vasey. He had not yet reached the examination of my large box of plants to him and for which he recently sent me an extra \$100. It is hoped that he will speedily recover.

The good little Baron Costen Jackson has concluded to remain over the winter & sends me some valuable accessories for my microscopical & entomological studies.

Dr. Parry is busy distributing my flowers - the hard task you

so kindly performed for me a year ago,

My new found friends in Santa Barbara, are studying botany very zealously and every mail is packed with plants from them for determination; chief among the active workers there, is the Treasurer of their new Nat. Hist. Society, Miss Sara A. Plummer, who is the next most deserving person for whom my dear Dr. I will petition for honors, I now own Southern Cal., Ill., should any other new things occur please remember Miss Plummer.

Came up here early hoping the altitude & freedom from care would restore me to health, & I am going, but slowly, Am only able to read or

P. S.

Let me plead again the merits
of Mrs. Parry. She is a good
intelligent, appreciative & useful lady,
and I would like very much to see
her honored. If I should be
able to collect any more new
things out north, & cannot
hope to get you to name for
her a plant she had not seen,
is this is my only chance.

Please don't let the presence of
her eminent husband in the great
family of Silé prevent the intro-
duction of this good woman who
has shed many tears of gratitude
when talking with me upon this beau-
tiful flower.

A word concerning Dr. Palmer's
denerite, Prof. Sargent desiring
to help me a little, ^{kindly} requested
me to go with Dr. Parry & collect
Colorado conifers - item appearing a
profitable scheme. Dr. Parry had

now nearly forgotten & removed
Mr. S. seems to have got it off
offered the job to Dr. Palmer, to
which Prof. S., objected. (I omit
the reasons,) When Dr. Palmer
was urgently requested by Dr. Parry
to yield to me, he stoutly refused
and this too, when I had cared
for him during the case of his
injury on the side of Mt. San
Bernardino to the neglect & injury of
my plants collected alone upon
the summit, including what after-
wards became (I'm glad to say,) Gilia
Parryi, of Bear Valley,

It appears also, that Dr. Palmer
seldom or never recommends for honors, and
now, after 10 or a dozen years of col-
lecting, knows but little of plants,
scientifically.

If this is too out-spoken I beg. pardon, I
only wish to earnestly request your recall of
Gilia Palmeri & restore it to S. Parrye.

Hastily but truly yours &c.

Loemmon,

Lemmon, J. G. 1876. "Lemmon, John G. Dec. 12, 1876." *John Gill Lemmon letters to Asa Gray*
