

I shall not cease sending
until I make Dr. Gray's col-
lections of Canadian plants as
nearly complete as possible.

My route this year was
generally about Lat. 50°.

I see by the papers that
Dr. Gray has published a
revision of the Compositæ.
Could you oblige me with
a copy?

Very truly yours
John Macoun.

Seneca Watson Esq.

Herbarium,

Harvard

Jan 1st

Belleville

Dec. 18^A 1880

My dear Sir.

I reached home from
my long trip a few weeks
since and am now going
over my collections.

I am putting up
a number for Dr. Gray and
will send them off at once.
I send 200 species now and
would be glad if you would
look carefully at those without
a specific name as they are
principally additions to my
collections of former years.

I think you will
find a few to interest you.

Macoun
Dec. 12

Dec 23^A

Dear Sir.

I have opened this note to say that I send on for you 322 species or specimens. This brings me to the end of other Carices for the present. My next parcel will include the grasses.

I am troubling you by sending the enclosed parcels but the charges from here are too high.

I hope you may be able to find many interesting things. If you choose send the unnamed Carex to Mr Boott.

Yours respectfully
J. Macoun,

Macoun, John. 1880. "Macoun, John Dec. 18, 1880 [to S. Watson]." *John Macoun letters to Asa Gray*
