

Columbus O. 7<sup>th</sup> Juny 84

Dear Prof. Watson.

Nothing escapes your sight. Your precision is really wonderful!

That *Fichtustomum Canadense* as synonym of *Racomitrium lanuginosum* is quoted by Muller or described by Richard. But I know nothing more about it, nor has it been remarked by Sullivant to my knowledge. The quotation you propose is advisable; but is it not best to say Rich. instead of Michx?<sup>?</sup>

Can you quote as ~~the~~ author the one who has given the name of a species without description? Perhaps yes; as Schimper quotes the name <sup>wrongly</sup> given to the plant, by Sullivant, <sup>*Cryphaea glomerata*</sup>. It seems however that it is not enough to give a name and thus merit the right of authorship. You will know best. *Cryphaea nervosa* Hornem. should be accredited to Bruch & Schimper.

Very sincerely yours  
A. Spegereim

I return proofs 284-300 to day.

Columbus O 30<sup>th</sup> Jan'y 84  
Dear Prof Watson.

In answer to your kind note of the 22<sup>th</sup>.  
I have only to say that the proof not being  
forthcoming, I supposed that there was some  
good reason for the bill well knowing that  
under your direction, all is going forward as  
favourably as possible.

About Phycomitrium hians, Lindb. - I have  
never considered that species as a good one, and there  
is good reason to admit P. Hookeri, instead  
of P. hians as Lindb. himself makes it  
a synonym. In that case also Gymnotorium  
turbinatum Mchy. should be given as syn.  
according to the note of Lindb. (p. 51 foot note)  
But we have not seen the specimen of Mchy. and  
should we have seen it, we would have con-  
sidered it as mere var. of P. pyriforme; for  
as said above, neither myself nor Sullivan have  
found sufficient reason to separate that P. hians  
as seen in the Mus. canic.

Funaria hygrometrica is Linn. in Schp.  
Syn. and after that Hedw. et omnes auctores  
recentiores. It is also Hedw. in Muller. Heinwig  
being the first author in this century, I suppose.

*Funaria microstoma* is Buch & Schp.  
neither Schenck nor Schneck, at least to my  
knowledge. Possibly the expert has written  
Schmitt for Schimp. or I may have made  
that mistake myself. But Schp & Buch  
are the authors of that species.

I will see about the habitat of *Bartramia*  
*formosus*, as I do not remember what I  
have written.

With best thanks for your notes,  
I remain as ever  
Very truly yours  
J. S. Sargent
