My dear Prof Watson

As there are some errors, I return the proof of pp. 389-411. - I do not know where I have seen circinnate with two n, and I can not find. It is probably one of my lapsus memoriae. Your addition to species of uncertain affinity is quite right. That locality, which was called Summit or Summit portage before the building of the R. R. crossing the Allegheny from Altoona should be named with a S Summit or Summitville, as it is now marked upon the Gazetteer. But perhaps Summit Portage is best, as the village Summitville was not in existence when I collected moose on these mountains. - I am glad those species could be described at their place. There is scarcely any addition to make.

I got the proofs yesterday evening. Perhaps it would be best to return them to me if I have to read the whole work through. But my set of proofs is incomplete. I return a parcel you had the kindness to send me before.

Maculate is not described in the Glossary. Please to put it in.

Very truly yours  
A. S. Rehn.

Lesquereux, Léo. 1884. "Lesquereux, Léo May 2, 1884 [to S. Watson]." *Leo Lesquereux letters to Asa Gray*
