

960 Goss St., Denver, Colo.
Oct. 16, 1891.

Professor Sereno Watson:

Dear Sir,

I hope that you won't consider me too great a nuisance, for I want to trouble you again. This time I am perplexed concerning some species of *Atriplex* which I found at Grand Junction, Colo. I was there a few days in May and again in August for a day or two.

I noticed that you had named nearly all the species of *Atriplex* and for that reason send to you.

at Gr. Junction, I found *Atriplex canescens*, *A. confertifolia*, *A. Nuttallii*, *A. expansum*, *A. argenteum*, *A. Wolfii*, *A. patulum*, var. *laetatum* and two more. One is a perennial and seems to be *A. polycarpum* of the Botany of California. The other seems near *A. Wolfii* or *A. Saccareum*. The fruit is not ripe enough but that could not be helped. I found but two specimens one of which I send to you.

You may be interested in knowing that *Salsola Kali* grows near Denver. It is near the railroad track and has been recently introduced. Respectfully, Alice Eastwood.

Eastwood, Alice. 1891. "Eastwood, Alice Oct. 16, 1891 [to S. Watson]." *Asa Gray correspondence*
