

of the American Journal in which you  
refer to Baillon's *Chinese Gymno-*  
*cladus* (misprinted *Gymnocalamus*) - it is a  
well-known Gleditschian as we  
ascertained at New last year when  
Baillon's paper came out - but whether  
from New I cannot tell the species  
name.

Yours ever sincerely,  
George Bentham

25, WILTON PLACE.  
S.W.

March 15/76

My dear Gray

It is some time since I have  
written to you but I have been entirely  
absorbed in *Genera Plantarum* and it has  
been too late to ask you usefully any  
questions. I now expect the last proof  
today or tomorrow so that I shall be able  
this week to read the Index to prep. As  
that comprises nearly 6600 names it  
will I suppose take a full fortnight to  
print still I hope to have the part out  
before the middle of April. It will be a  
thick and expensive part - rather above  
27 sheets (part 1 had 35 sheets) so that we  
shall be obliged to put rather a high  
price upon it and I should like to

know what I am to do about the copies  
for America. Hitherto you have taken  
10 copies at that price but you  
intimated to me that it would be no  
longer convenient to you to do so yourself  
but you asked me to let an American  
publisher have them on the same  
conditions - I do not care to open a  
credit account with any more publishers  
than the two (Reeve & Co and Williams &  
Norgate) in whose hands at present and  
especially as it does not well suit me to  
open an account with any one in the  
trade out of England. I do not of course  
ask you to take again the trouble you  
have had on former occasions and the  
only way I see is for the Americans to  
order their copies in the ordinary way  
through one of the two publishing firms  
here or if any one chooses to take the

10 copies from me ~~and paying ready~~  
~~money~~ I should be happy to give them  
at the trade discount - The selling  
price of the part will probably be  
30/- but ~~for ready money~~ I give single  
copies according to the now usual  
custom at 2/- in the selling discount  
(which would be 25%) or to any one  
taking at once two or more copies,  
at the trade discount of 25% (marking  
22 $\frac{1}{2}$ ) the sale hitherto has nearly  
but not quite covered our original  
outlay without any return for interest.

I am now fairly in the new  
volume of *Flora Australiensis* - all  
rather laboursome as a great number  
with *Lectiares* but I shall have a  
tough job with *Heteroceras*, *Gymnospermae*,

I saw this morning a new number

Bentham, George. 1876. "Bentham, George Mar. 15, 1876." *George Bentham letters to Asa Gray*
