

Since Prof. Whitney gave me  
Wood's characteristics of his genus  
"to annoy me" as he said and Prof.  
Brewer sent another, I may return  
one to you again.

Hopeing to hear from you again I remain

Yours very

W. C. W. most sincerely  
John Bolander  
Washington State  
and send me your sets  
and I will send mine back

I will go to work and make up  
some additional sets next spring.  
If nothing prevents me, I will go  
to Auburn in Spring and fallow  
in June the new Pacific Railroad  
which goes now to the very summit.  
The whole month of June spent

Octr. 23. 67.

My dear Sir,

Just now I re-  
ceived your favor of Oct 4<sup>th</sup> in  
which you announce the new  
genus. I am very much obliged  
to you for this act of extreme  
kindness.

You have not given me the number  
of the plant and thus I am left  
in the dark which it is; for, if it  
is not largely represented for the  
sets, it may be possible to procure  
it this spring.

I will go to work and make up  
some additional sets next spring.  
If nothing prevents me, I will go  
to Auburn in Spring and fallow  
in June the new Pacific Railroad  
which goes now to the very summit.  
The whole month of June spent

(B.C.H.)

the number will not be  
as great as I would have  
seen it convenient to add in  
bulbs however you may come  
over to see all the way of  
them it is very favorable  
that we will be mostly all  
to go as it has been decided that  
it will damage the legal tree if  
any of them fall.

The number of trees of which  
I judge here are described and  
of new specimens of each of  
which have been added to the collection  
and will be given to you at my convenience  
and you will be very welcome to do so.  
I hope you will be able to do so.

on that road would give me  
a large number of plants.

I am glad to learn that all  
sets are engaged and I do not  
doubt the buyers will be pleased  
with the specimens.

Anxiously do I await your  
revision of the liliaceous  
plants of California. Of  
some I have a large number  
of bulbs in cultivation, which  
I stake up every fall. If you  
desire some I will send them  
on immediately.

My school is a public school  
and the salary fair per year  
is \$100. This situation  
will enable me to do considerable  
every year in collecting, especially  
in the month of June which is  
entirely my own.
