

San Francisco Aug 16. 65.

Dr. A. Gray Cambridge Mass.

My dear Sir,

Your favor of May 3rd has been duly received. In looking over Prof Thaxter's names of my grapes, I felt the necessity of making some remarks in regard to his determination. As yet I have not received an answer respecting them. My object being to assist in the understanding of Calif. plants I thought it well to delay the lists until they are satisfactorily disposed of.

Some time ago I sent a set of the same Grapes on request to Sir Wm. Hooker who wrote to me since that he submitted them to Cal. Maus and would let me know as soon as

possible his opinions about them.
If then you have no objection I
shall wait until I hear of both
again, namely Prof. Pursh and
Sir W^m Hooker.

Sometimes ago I sent you two
small parcels of seeds of the
A. elephantophylla. I hope they
have safely arrived.

As it is highly desirable for
me to pass you various articles on
and revisions of Am. Genera I would
like to propose to you an exchange.

As your herbarium may not yet be
supplied with good perfect specimens
of Cat. cryptogamic plants, especially
the new mosses and Lichens discover-
ed by me, I would like to furnish
them for you in large showing speci-
mens for the publications above
mentioned.

Since I was made Curator of
Botany by our Academy, it becomes
a necessity to study up the phaner-
ogamic plants in our herbarium.

On the 30th of last month I
made a trip especially for pur-
suing the fruit of *Pithecellobium*
montana, but it was too early.
Some had just begun forming the
Pods and others were just in bloom.
At the close of this month I will
be after them again.

Dr. Torrey is now at Reese
River Nevada.

Since it is doubtful that I get
any help from the Survey to visit
the Sierras, I shall go on my own
expenses to Eureka, provided I
can go overland. There is a good
trail used by the mail carriers, but
visited by hostile Indians. It may
be however that all is right by
the 15th of next month.

With due regards

Yours
very truly
Henry M. Bolander
