

1852

My dear Gray

I enclose a tracing
of *Rhizidea ligustrina* from
the pen of Miss Lindley - The
two Miss Lindleys are at
present on a visit here
with their father and
are very nice girls

When you next write
pray tell me whether there
is any place where I can
send for you small parcels
I now want to send you a
copy of my paper on Javanese
leguminosae - an 8^{vo} pamphlet
and know not what to do
with it.

I have been taking advantage
of Lindley's visit to get my
Orchidace in order - I have
a tolerable collection of them
- thank to you I have most
of your N. American ones - but
not Nuttall's *Tepularia* which
I understand is very rare

Lindley is going to publish
a revision of the order but his
plan is not to follow regularly
from the beginning but to take
up in the first instance such
genera as he can best work up
and leave till last those about
which his data are as yet
insufficient. They will all be
printed uniformly so that they
can be bound up in any order

that may appear desirable
Have you got Sloane's *Jamaica*?
If not I have a duplicate copy
which I shall be happy to
send you

Ever yours sincerely

George Bentham
