

New York Botanical Garden,
Bronx Park,
New York City.

October 15, 1915.

Dear Professor Farlow:

Your letter of the 14th and the two packages of algae are just at hand and I thank you very much, both personally and in behalf of the Garden, for your kindness. We are very glad to have all of these specimens. The Columbia University set of the Farlow, Anderson, and Eaton exsiccatae was defective when Underwood and I arrived on the scene in 1896, but the specimens that you now send go far towards filling the gaps. Certain things, mysteriously missing from the Columbia herbarium, reappeared when the private herbarium of a former curator was bought back after his death some years ago, but these algae were not among them.

The best set of duplicates from Coker's Peruvian algae has already gone to Washington, but there still remain some Peruvian things of probable interest that I shall hope to send you within a few days. And we have a considerable number of duplicate Hepaticae from the United States and the West Indies that you would perhaps find acceptable. The originals or supposed duplicates of these have been named chiefly by Evans, Underwood, and Miss Haynes. In our next distribution of duplicate algae from the West Indies, I shall be glad to send you one of the best sets.

Very sincerely yours,

Marshall A. Howe

Professor W. G. Farlow,
24 Quincy Street,
Cambridge, Massachusetts.

New York Botanical Garden and Howe, Marshall A. 1915. "[Letter from M.A. Howe to Farlow, Oct. 15, 1915]." *William Gilson Farlow miscellaneous specimen lists : collectors N-P*
