

Botanical collections, L. J. Brass

Earliest collections, made in southeastern parts of Queensland, were not numbered in sequence, and probably no duplicates were kept. Serious collecting began in 1919, when a start was made in sending specimens to C. T. White at the Queensland Herbarium.

Nos. 1 - 44. Beaudesert area, S. E. Queensland, 1919-1920. Collections sent to Queensland Herbarium.

45 - 403. Wollongorang, Northern Territory, Australia, May 1921 - December 1923. Wollongorang Station (= ranch), in the northeastern corner of the Territory, served as a base from which small collections were made from the coast of the Gulf of Carpentaria to a distance of about 70-80 miles inland. Place names other than Wollongorang, such as Settlement Creek, appeared on the field labels; some of the collections were made in Queensland, the $\frac{1}{2}$ border of which was only about three miles east of Wollongorang homestead, and in which Wollongorang held a block of country on pastoral lease. Set of collections sent to Queensland Herbarium.

404-500. No records available. Collections were made at Crows Nest, southeast Queensland in 1924, at Forest Home Station, on the Gilbert River, north Queensland, in 1925. Collections sent to Queensland Herbarium.

Sometime during the 1930's, my small private herbarium, principally of plants from the Northern Territory and Queensland, was presented to Kew. All numbers were already represented in the Queensland Herbarium.

Duplicates of the earlier Florida collections were presented to the Gray Herbarium (ca. 1200 numbers), U. S. National Herbarium, and herbarium of the Agricultural Experiment Stations, University of Florida, Gainesville (over 400 numbers).
