---

The Cerambycidae of Honduras, like many other groups of insects, are not as well known as those from most other Central American countries. A preliminary study of the collection at the Escuela Nacional de Ciencias Forestales, Siguatepeque, Honduras, assembled by Jerome V. Mankins from material collected primarily by himself and his students, the private collection of Gary V. Manley of the Standard Fruit Company, presently located at La Ceiba, Honduras, and 1978 collections made by Edmund Giesbert and by John A. Chemsak, E. G. and J. M. (Mrs. E. G.) Linsley revealed not only many new records for the country but significant northern and southern extensions of known geographical ranges. As a result, we decided to make as much of the collection data as possible available at this time. We have omitted undescribed species, of which there are many, some of which will be described elsewhere, as well as those species which cannot now be identified with reasonable certainty. Thus the paper is not intended as a list of the Cerambycidae of Honduras but merely as a preliminary contribution to a knowledge of the cerambycid fauna of that country.

Those species designated by an asterisk represent, to our knowledge, new records for Honduras. The letter N indicates a northern record for the species and S, a southern record. Because of the difficulty in determining the sex of many species without the aid of a microscope, we have omitted citing this in a number of cases.

Localities

In the interest of saving space, and since the number of localities involved are relatively few, they are listed below within the appropriate Department.

Honduran Localities

Barocoa—Cortes  
Catacamas—Olancho

Los Manos—Yuscaran  
Minas de Oro—Comayagua

### Acknowledgments

This study was carried out in conjunction with a National Science Foundation sponsored study on North American Cerambycidae through Grant DEB 76-23849 A01.

John Chemsak and E. G. Linsley wish to express appreciation to the authorities of the Escuela Nacional de Ciencias Forestales in Siguetepeque for providing living accommodations for them and Mrs. Linsley during their stay in Honduras, as well as making facilities at the Escuela available for examination of the collections. We also wish to thank Gary V. Manley (G.V.M.) and Edmund Giesbert (E.G.) for allowing us to extract records from their collections. Material collected by the authors and J. M. Linsley is designated by the initials, J.A.C., E.G.L., J.L. and J.V.M.
