

I can send you A. parvulum shortly
There is no Aspid., Californicum, nor L. Sudovicianum
MIDDLESEX SCIENTIFIC FIELD CLUB.

Ms Feb 19-79

Medford Feb 13 1879
Malden, Mass.

Mrs Myers

I have now recd from the printer his final estimate of cost and though at first it somewhat demoralized me I have resolved to take all risk and publish the Catalogue without changing the price. In making additions I did not realize how much extra work I was doing until the printer tells me that I had just doubled the original mss., and now instead of 26 pages you will get 52 pages of matter. The cost to me will be exactly double and it will take exactly 200 copies to cover the cost of printing alone. But if the "Fern Folk" will only sustain me I will give them something that will be worth a great deal more than 50 cts to them. The "Naturalist" for March will contain my note on Aspidium Boottii and as I am to have extra copies I will send you a slip and it will give you an

idea of the character of the notes
in the Catalogue. As soon as I
can learn definitely about what-
time it will be ready I will
let you know. I am sorry
to learn of Mrs Barnes illness
She wrote me about her little ones
sickness. She seems to have more
than her share of trouble this winter,
but I hope it will soon turn the
other way. I fear I shall not be
able to supply any of the list of
desiderata sent. Those are all rare
& difficult to get. Dr Parry when in
Boston promised to collect one all he
could of those during his Mexican
trip, but I have not heard from
him as yet. If I get duplicates
my Syracuse friends will be the
first ones remembered.

With kind regards to all I
Remain Very Respectfully
Geo. E. Davenport

Davenport, Geo. E. 1879. "Davenport, George E. Feb. 13, 1879 [to F.J. Myers]."
