Mrs. Meyers

I enclose some
N. Paragi and a little C.
Viseidae for you. I expect
more of the latter in April
I hope to have enough to
distrubute among all my
friends

I intend shortly to make
some inquiries about the B.
boreale that may lead to a
knowledge of their source,
and will keep you in mind.
I suspect that they come
from abroad but do not
know.

I am much better in health
and trust that you are.

Your letters do not tire me.

would they j live as long,
I am always glad to
hear from and to see you
whenever I can,

Yes, I will go on with
the Hand Book but I fear it
will be slow work so many
things interfere.

Very Respectfully
Geo. E. Davenport
