

Columbia College Herbarium

Madison Av. and 49th St.

New York

Nov. 30, 1887.

Dear Dr. Gray:-

I thank you sincerely for your kindly criticism of my use of a new binomial for Comskelitum Canadense, ^{Proc. Linn. Soc. Gray.} which notwithstanding the kind tone of your letter has evidently displeased you, and as this, I deeply regret it.

I would not have you think that I made that name simply for the very poor satisfaction of coming a new one. I worked over it a good while and supposed that it was moderately sure of having taken up the oldest specific name for the plant, for I concluded from a careful examination of Walter's book that

N. L. Britton

he must have known the species in question. And as it comes from the Carolina Mountains, at all events, this is not so unlikely.

The Athamanta Chinensis part of it I was not familiar with, though your letter reminds me that you had a note on it not long ago. Had I seen that at the time I should if satisfied with the reference, written Onoselimum Chinense as you have done in your letter.

There is no doubt that there are, as you say, pitfalls for young botanists, and I presume the proper thing for them to do is to avoid writing anything. Indeed, as you may gather I am considerably disengaged at my first attempt at changing ~~and~~ a name though of the propriety of using the oldest specific name I am not yet decided what ground to take. I had rather talk with you about this than write. At all events I thank you for the consideration with which you have treated me.

N. L. Britton
Very Respectfully yours

Britton, Nathaniel Lord. 1887. "Britton, Nathaniel L. Nov. 30, 1887." *Asa Gray correspondence*
