

Cambridge

19 October, 1903

Dear Mr. Druce;—

Mr. Fernald makes one of the
grasses (for which we looked through all
the Manual genera) *Trisetum palustre*,
hitherto not known north of the Blue
Hills which is itself a station much
north of the Manual range.

The *Panicum* I have left at the
Gray Herb. for Professor Hitchcock to
examine when next he comes here.

Sincerely,

Arthur Stanley Pease
