

2 April, 1913

Dear Mr. Deane: -

I was pleased to hear from you and learn of the work on the grasses, and also to know that my plants are proving of any use. We fortunately escaped here from any danger of wind or flood and spring is now setting in apparently in earnest, though it was only a few days ago that I saw the first dandelion and that the Hepaticas in our yard came into bloom. Later I shall probably get out on one or two trips. You will be interested to know that the number in current hand and I think is correct) that the headship of our botanical department is to be taken by Professor Trelease. I hope it may be so.

I expect to be in or about Boston for two or three days sometime in June and to look up there some of last year's Cobb Co. plants at the Herbarium. I think I have one or two extensions of range, perhaps, especially what appears to be Lobelia spicata var. hirsuta. Later in June I may collect for a few days, perhaps at Pansy, N.H. (near Stark), and then with a friend take a walking trip through certain parts of Cobb Co. not often or rarely visited and pick up some of the more significant things in them. One thing we must do is the Wild R. valley and the range to the south east of it. Also some of the ground S. and E. of Dixville. Give our regards to Mrs. Deane and the Cooks. With cordial wishes, A.J.P.

THIS SIDE OF CARD IS FOR ADDRESS ONLY

Mr. Miller Drane  
29, Brewster Street  
Cambridge
