

Urbana,

7 March, 1915

Dear Mr. Drame: -

Again I must thank you for the nice
map which will be very useful to me. I am trying
to make as large and complete a collection of
things as I can on the topography of Coos County -
maps, journals, etc. - to have at Randolph and
make use of when there. What I am most eager
now to get is the Berlin hills Co's blue-print
of their northern N.H. properties - similar to the fine
one you sent of the Stone-Walster Carleton Lake region
holdings

It's fine news about the completion of the central part of the Stadium, so that we can feel now that things are really fire-proof. How surprised Professor Gray would be if he could step in now and see the new building!

Although it is snowing a little just now we have a feeling that winter is nearly over. The grass is getting green in places, the tree buds are swelling, and observers say that the spring birds are unusually early in their return hereabouts. I've not had many walks - as is usually the case in the winter - because the mud doesn't permit one to go far into the country till it dries up. Professor B.J. Robinson once told

me that to dignify their Office must soon die up, and he wasn't far from right. By the way, he and his folks were once pupils of President James of the University, when Mr. James was at Bloomington, I think.

Give our kindest regards to Mr. Deane. We are all well and busy and little attention to large and elaborate you would think has never changed from last summer.

I may come soon, not by way of Philadelphia later, as I had planned, but by New York and Boston, looking up the Robins' Stadium, as I perhaps would you.

Sincerely yours,
William Lindley Rouse.

Pease, Arthur Stanley. 1915. "Pease, Arthur Stanley Mar. 7, 1915." *Walter Deane correspondence*
